-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION***Claim Rejections - 35 USC § 102***

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-2,7-11,21-24,27 are rejected under 35 U.S.C. 102(b) as being anticipated by Wright et al.(US 3,557,927) or Strand (The Computer-Integrated Courtroom).

Claims 1,2,7: Wright discloses communicatively coupling a computer aided transcription system to a remote system; identifying by the remote system the computer aided transcription system communicatively coupled thereto in (fig.3). Strand in (page 3). Wright discloses communicating by the remote system to the computer aided transcription system an authorization for a predetermined amount of transcription in (col.9,lines 16-28). Wright disclose transcribing by the computer aided transcription system, representation of spoken words to text in real time and disabling by the computer transcription system, the transcribing after the predetermined amount of transcription has been reached in (col.3,lines 45-48,61-69 and col.9,lines 25-28 and fig.3). Strand in (pages 3-5).

Claims 8-11: Wright discloses transcribing by a computer aided transcription system, representations of spoken words to text in real time in (col.3,lines 45-48,61-69). Strand in (page 3). Wright discloses monitoring by the computer aided transcription system, the transcribing in (fig.3 and col.3,lines 45-47). Wright discloses disabling by the computer aided transcription system, the transcribing after a predetermined amount of transcription has been reached in (col.9,lines 25-28). Strand in (pages 3-5)

Claims 21-24,27: Wright disclose communicating to a computer aided transcription system an authorization for real time transcription of spoken words in (col.3,lines 45-48,61-69). Strand in (page 3). Wright discloses automatically indicating for a user of a computer aided transcription system that an

amount of real time transcription of spoken words has occurred in (col.9,lines 25-28). Strand in (pages 3-5).

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claim 15 recites the limitation "the monitoring". There is insufficient antecedent basis for this limitation in the claim.

Claims 17-20 are dependent on claim 15, follow therewith.

Allowable Subject Matter

Claims 3-6,12-14,25,26 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-15,17-27 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-24 of U.S. Patent No. 5,970,141. Although the conflicting claims are not identical, they are not patentably distinct from each other.

Information Disclosure Statement

Applicant is requested to provide dates for following NPL documents (IDS dated 4/23/07).

- a)LiveNote: User's guide, LiveNote Technologies
- b)"Discovery: Quick Reference Card", Product Brochure
- c)"Discovery Video zx Litigation System", product Brochure
